**Installed in:** 2005**Interior project and installation:** Cador  
Centro

### Project

Deloitte is the largest Spanish professional service firm. It is a member of the Deloitte Touche Tohmatsu international organisation, which employs more than 120,000 professionals in 150 countries around the world. It provides corporate, financial, process, human resource and legal consulting services.

Its central offices are in Madrid's Torre Picasso. They take up a surface area of 16,700 m<sup>2</sup>.

### Requirements

The project consisted of moving the company's offices, with 1,900 work posts, to Torre Picasso following the fire in the Windsor building. The following spaces needed to be configured: management offices, conference room, group work area, reception area, etc.

### Solutions

A sustainable, interior compartmentalisation system with reusability potential which did not ignore either appearance or user comfort was chosen. The office and conference room areas were fitted out with Movinord's demountable partition system with hidden profiling, M92, finished in Azul Nube on panelling and Blues on profiling.
