Installed in: 2004

Interior project and installation:

Cador Navarra

Project

FRINAVARRA forms part of the CANFRISA group. It is a company devoted to the preservation and freezing of foodstuffs. It has a refrigerated warehouse, freezing facilities, bagging/handling rooms and logistical services.

The project consisted of fitting out the new floor of offices at its facility in Milagro.

Requirements

The following spaces needed to be configured: management offices, meeting room, group work area and reception.

Solutions

A flexible, integral solution was chosen for the three dimensions of interior space in order to provide easy access to the facility and possible redistribution in the future. The systems chosen were M82 and M92 partitioning and wall storage with the Oxiron finish on profiling and Tilo Atenea for panelling. Freelay access flooring with the Country Cherry HPL surface finish was also installed.

A total surface area of 450 M² of M82 partitioning, 34 M² of M92 partitioning, 105 M² of wall storage and 298 M² of Freelay access flooring was installed in the offices.
