Interior design and installation by:

ESPAMODU, S.A

**Project**

The Municipal Urban Planning Company of Pozuelo de Alarcón (SUMPASA) is, as its name suggests, located in Pozuelo de Alarcón, a town some 10 km northeast of Madrid.

Sumpasa has been working for more than 15 years, time over which this public company has developed and promoted land in this part of the Community of Madrid.

Requirements

The Sumpasa office project consisted of organising and dividing a floor into four offices and a meeting room.

Solutions

Despite the small amount of space available, a classy design has been achieved through use of M92 partitioning and D92 wall cover with horizontal modulation in a varnished Haya finish on doors and panels and RAL 9006 on profiling. The effect transmits the right kind of atmosphere and the desired levels of comfort for companies which, like Sumpasa, seek style and distinction in the working environment.

A total surface area of 95 m² of partitioning was installed in the offices.
